NAME: _____

FIRST NAME: _____

STREET ADDRESS, NUMBER: _____

ZIP, CITY: _____

PHONE: _____ FAX: _____

Item requested: _____

Color: _____

Standard size: _____

Given that standard sizes vary from manufacturer to manufacturer, we need the information requested in the listing below to determine your exact size for our garments.

The risk of having to exchange merchandise and the related inconvenience can therefore be kept to an absolute minimum.

I have come up with the following measurements:

Body height (length): _____

Waist for normally high cut pants in cm: _____ (as a basic measurement)

Please measure horizontally and tightly around the waist, preferably while wearing an optimally fitting pair of pants. Measure at belt level without wearing a belt. Do not add any tolerances, leather does have some give.

Hipster pants waist in cm: _____ (as a basic measurement)

Please measure horizontally and tightly around the waist, preferably while wearing an optimally fitting pair of hipster pants, just above the hip bone or on top of the pants' waist. Do not add any tolerances, leather does have some give.

Hip width in cm: _____ (as a control measurement)

Please measure around the widest part of your hips and buttocks, horizontally, pulling the tape measure tight.

Outer inseam in cm: _____

Please measure this side inseam including the waist band (i.e. from the very top of the pants.). Do not bend over while doing so, but have a second person take this measurement for you. For calf-length pants and boot-cut riding crops, please indicate the inseam ending above the calf (calf covered, i.e. no longer visible), for leather jeans measure all the way to the ground.

Thigh circumference in cm: _____ (as a control measurement)

Please measure your thigh circumference where it is the widest (without cutting into the flesh, only slightly snug), which is usually directly under your instep.

Instep length in cm: _____ (as a control measurement)

Please measure exactly from the instep/crotch (where the two pant legs are sewn together) to the floor (jeans) or calf covered (calf no longer visible) for calf-length pants and boot-cut riding crops) the inner inseam. Do not bend over while taking this measurement, but have another person take it on your behalf.

I would herewith like to place an order based on the payment and delivery terms and conditions, which I am familiar with.
